DSCSA Serialization
RxChain Basic Edition

Turnkey FDA Compliance
Product Tracing 3Ts
CMO/3PL EPCIS
Lot/Serial Shipping

RXCHAIN® BASIC EDITION

RxChain® Basic Edition (RxChain® BE) is a Turnkey DSCSA Serialization solution for small manufacturers, distributors, and dispensers to meet the following FDA DSCSA compliance requirements on a budget.

- Electronic Product Tracing
- Serialization
- Lot/serial control

RxChain® BE users who need shipping and portal access may purchase the following additional hardware and software.

- Scanners for UPC and 2D barcode scanning
- Label printers for shipping label printing
- Touchscreen Windows 10 commercial PC

Designed with small business in mind, RxChain offers full DSCSA Serialization compliance at an affordable price. Users who require scalability for their fast-growing business has an easy path to upgrade to RxChain® Standard Edition, enabling full enterprise supply chain capabilities including integration to ERP and WMS.

RxChain® BE FEATURES AND CAPABILITIES

RxChain® BE is a cloud solution that is intuitive, graphic, and easy to start up. This turnkey solution has the following features.

- NDC and GTIN master data
- Automated EDI ASN
- Manual Serial Response with CMOs
- Scan to shipping
- 3PL EPCIS data exchange

- Automated Product Tracing - 3T report
- Automated Serial Response with CMOs
- Inquiries, decommission, de-aggregation
- CMO EPCIS data exchange
- Customer EPCIS data exchange

RxChain® BE ADD-ON MODULES

RxChain® Portal is available as an added-on to RxChain® BE users. RxChain® Portal enables data accessibility for external partners and customers outside of the firewall. Portal Users can retrieve, download, and upload 3Ts and EPCIS data as needed. RxChain® Portal contains the following features.

- User Administration
- Data encryption
- 3Ts - Track and Trace Report
- EPCIS data

SCALABILITY TO RXCHAIN® STANDARD EDITION

Moving up to RxChain® Standard Edition (SE) is the next logic when a growing company expands in their demand for greater computing power and system capabilities. RxChain® SE is a full feature serialization solution for mid to large market companies, enabling integration, RxChain Mobile Client, and data analytics. RxChain® SE contains the following features.

- Single Tenant Environment
- Role based user administration
- RxChain enterprise features
- RxChain Mobile Client
- Integration to ERP, WMS, and other systems
- Supply chain metrics and dashboard
