# OneScan

## VRS Connectors

- ☐ Lookup Directory (LD)
- ☐ LD Sync (daily, real time, and on demand)
- ☐ Global GTIN Master data
- ☐ APIs - LD, notification, EPC update
- ☐ Sub-second request and response
- ☐ Automatic negative verification alerts
- ☐ GS1 short messaging standard
- ☐ HDA governance
- ☐ Provider interoperability (all providers
- ☐ EPCIS interoperability (ATTP, Axway)

## Verifier

- ☐ Scan 1D, 2D barcode
- ☐ Verify serialized packages
- ☐ Negative verification alert to manufacturers
- ☐ Initiate product investigation
- ☐ In-app camera, email
- ☐ Recall, shelf check, disposition
- ☐ Brute force attack protection
- ☐ Full transaction history tracking
- ☐ Dashboard with 14 KPIs
- ☐ Mobile responsive

**123** Thousand verification requests

**0.02** Second response time

**23.5** Thousand GTIN records

**69** Thousand notifications

**64** Thousand negative verifications

**5.4** Hundred Investigations

**16 FDA 3911**

## Enhanced Issue Tracking

The increasing amount of investigations, fueled by rising cargo theft and high-volume negative verifications, challenge the industry's capability to mitigate the functional impacts as well as regulatory requirements. Manufacturer, wholesaler, retail pharmacy need enhanced issue tracking system to identify, investigate, and reporting suspect products. Architected with corporate data security and built with new technologies, process flows, and collaborative workspace, LSPediA's enhanced issue tracking system, OneScan Investigator, enables a scalable and sustainable approach to meet and succeed the FDA's compliance requirement and customers' business requirement.

## OneScan Investigator

Investigator provides an effective DSCSA workflow to manage suspect product investigation and illegitimate drug product notification. Upon receiving a product notification, Investigator enables manufacturer to clear an investigation therefore putting good product back to inventory or conduct suspect/illegitimate product investigation with in-app email and camera. Built with FDA compliance 3911 workflow, Investigator facilitates and keeps full investigation and 3911 reporting history.
